

IN NUMBERS

1.44bn

The UN expects China and India to each be home to 1.44 billion people by 2024, which makes the countries and wider Asia a highly attractive customer base for Middle East LNG producers.

INFOGRAPHIC

What is the most important 'next step' to establish a liquid, flexible and transparent Middle East LNG market by 2025?

- A. Build LNG storage hub in the region
- B. Establish a Middle East LNG benchmark price contract
- C. Regional domestic demand to outpace pipeline supply
- D. Remove all subsidies that fix natural gas prices at low levels
- E. All of the above in no particular order
