**Innovative LNG  
Carrier will Carry LNG  
from US to Japan**

**Trump's Tariffs  
may Chase  
Chinese Away  
from US LNG to  
Australian Gas**

**Argentina  
Joins LNG  
Export Club**

**LNG Takes  
on Coal in  
ASEAN's  
Energy Mix**

## IN NUMBERS

**6.3%**

China will post 6.3% growth in GDP this year, one of the highest levels worldwide – yet many are worried it's lower than the usual double-digit growth.

**The Middle East  
LNG Institute**

Established in 2017, the Middle East LNG Institute examines the evolution of LNG in the Middle East and North Africa (MENA) as the region transitions from a net-exporter to a net-importer. The Institute's mission is to facilitate the region's community of LNG stakeholders and share knowledge and best practices. The Institute also provides the insights needed to successfully navigate through what are still uncharted waters for many Middle Eastern energy stakeholders.

The Institute provides a single, independent and trusted platform for knowledge exchange, data gathering and intelligence sharing for stakeholders. These are crucial tools as the region explores comprehensive solutions to rebalancing one of the starkest juxtapositions in the global energy market. The Middle East is home to more than 40% of global gas reserves, yet the volume of the region's LNG imports is climbing as domestic demand outpaces pipeline supply. The status quo is being rewritten – new demand, new supply, new hubs – and an ability to flex to these dynamic conditions will create the winners of a market that is nearing the top of the global energy hierarchy.
