“The most important ingredient for the energy transition is the need for a global carbon price. Without it, very little will happen.”

Christof Rühl

Senior Research Scholar - Center on Global Energy Policy
Columbia University

“It’s not a question of whether we look purely for energy security or purely for energy transition. They have to work hand-in-glove. I don’t think you get energy transition without security and you don’t get security without energy transition.”

John Kent

Chief Transitions Officer
Kent
