OPEC+ STRATEGY TO BE GUIDED BY SUCCESS OF VACCINE ROLLOUT

H.E. Eng. Suhail Mohamed Al Mazrouei
UAE Minister of Energy & Infrastructure

Last Year was an extraordinary year and fundamentals are still changing all the time, so OPEC+ is implementing a phased approach to new supply volumes. We are meeting on a regular basis during the first quarter to add the necessary flexibility for required adjustments. The second wave of the COVID-19 virus prompted us to withhold from adding the planned 500,000 barrels a day to the market in both February and March, and we will decide on volumes for the second quarter at our March meeting. We're dealing with a pandemic that we have never seen before and although we are in recovery now, we must remain cautious. Whether the market can absorb an additional 1.5 million bbl of OPEC supply come April will depend on the success of the vaccine rollout, and how that impacts demand recovery. We also need to look beyond balancing supply and demand, to inventories that may build up during 2021, and we are still trying to reduce those to a normal level. We have had a better than anticipated start to recovery in January and now expect to see demand back to 2019 levels by the beginning of 2022. What is even more critical than prices and a balanced market, is ensuring that we continue to incentivize capital investment in new supply to ensure that the volumes are there when demand recovers.
